Criteri guida per la liquidazione del danno alla salute

Anno 2007

Per la liquidazione del danno alla salute il Tribunale di Roma adottò nel 1995 un sistema “a punto”, basato su una funzione di crescita del valore di punto più che proporzionale rispetto al crescere dell’invalidità permanente, elaborata da Mangili e Zoja nel 1996¹.

Nei dieci anni che ci separano da quella prima fortunata elaborazione la medicina legale e la scienza statistica hanno fatto molti passi avanti nello studio della funzione di crescita del valore normalizzato del punto di invalidità. In particolare, possono ritenersi ormai generalmente condivisi i seguenti principi:

1. Il valore del punto è funzione crescente della percentuale di invalidità. A parità di età, il valore di ciascun punto liquidato cresce con l’aumentare del grado di invalidità;
2. il valore del punto è funzione decrescente dell’età del soggetto. A parità di grado di invalidità, il valore di ciascun punto liquidato decresce con l’aumentare dell’età, in quanto persone più anziane rimarranno menomate per un periodo di tempo più breve;
3. L’incidenza della menomazione nella vita del danneggiato cresce in modo superiore rispetto all’aumento percentuale dei postumi;
4. L’aumento di cui al punto 3 deve avvenire non solo in termini assoluti, ma anche in termini relativi: ciò vuol dire che gradi crescenti di invalidità producono ripercussioni vieppiù crescenti sul danneggiato.

Tale sistema si è rivelato particolarmente efficiente sia per garantire nel contempo uniformità pecuniaria di base nella liquidazione del danno (parità di risarcimento a parità di lesioni); adeguata possibilità di personalizzazione del risarcimento; prevedibilità delle decisioni giudiziarie.

La validità di tale sistema è stata confermata sia dalla corte di cassazione (si vedano, in particolare, Cass. civ., sez. III, 20-01-2003, n. 737 e Cass., sez. III, 19-

05-1999, n. 4852, in Foro it., 1999, I, 2874, poi sempre conformi), sia, indirettamente, dal legislatore, che dapprima con l'artt. 5 l. 5.3.2001 n. 57, quindi con gli artt. 138 e 139 d. lg. 209/05 ha adottato sistemi analoghi.

I dieci anni ormai trascorsi dall'adozione di tale sistema hanno tuttavia costituito un tempo sufficientemente lungo per verificarne non solo gli aspetti positivi, ma anche le criticità. E' per questa ragione che, in esito ad un ampio dibattito tra i magistrati delle sezioni cui è tabellarmente demandata la trattazione delle questioni inerenti il risarcimento del danno alla persona, si è deciso di apportare, in occasione dell'aggiornamento Istat delle Tabelle per il 2007, alcune variazioni all'originario impianto del 1995.

Queste variazioni sono essenzialmente tre.

La prima e più importante variazione è consistita in un aumento graduale del valore del punto di invalidità, in misura proporzionale rispetto al crescere dell'invalidità.

Dall'esame di una notevole mole di decisioni si è infatti verificato come la personalizzazione del risarcimento del danno (e cioè l'aumento del valore pecuniario di base del punto d'invalidità) è risultata praticamente mai attuata con riferimento ai danni piccoli o medio-piccoli, mentre essa risulta applicata in misura via via più frequente a misura che si innalza il grado di invalidità permanente.

Si è perciò ritenuto equo adeguare il valore pecuniario del punto di invalidità, innalzandolo:

- del 10%, per le invalidità a partire dal 20%;
- del 20%, per le invalidità a partire dal 30%;
- del 30%, per le invalidità a partire dal 40%.

La seconda variazione è consistita nella scelta di modellare la misura del risarcimento dovuto per i danni c.d. micropermanenti su quelli stabiliti dalla

¹ MANGILI F. e ZOJA R., Il valore del punto percentuale di danno biologico: premesse, considerazioni e proposte, in Resp. civ., 1998, 579.

legge per il caso di sinistri stradali, di cui , anche nell'ipotesi in cui il danno non sia derivato da un sinistro stradale

Si è infatti ritenuto, per un verso, che la conservazione di due tabelle diverse per risarcire danni identici porrebbe seri problemi di equità; per altro verso, che la esistenza di una norma di legge la quale fissi il valore del *quantum* ne consenta l'applicabilità in via analogica (quanto meno per *analogia iuris*) anche ai casi non espressamente disciplinati.

La terza variazione è consistita nel costruire la tabella non più per fasce di età, ma variando il valore del punto per ogni singolo anno di età della vittima, al fine di rendere il più possibile personalizzato il risarcimento. Il demoltiplicatore in funzione dell'età è stato anch'esso desunto, per *analogia iuris*, dall'art. 139 d. lg. 209/05, in ragione dello 0,5% per ogni anno di età, a partire dall'11° anno.

Ovviamente, restano fermi i tradizionali criteri di applicazione della Tabella ormai codificati dalla giurisprudenza, e cioè:

- (a) la tabella è un mero parametro di valutazione: essa pertanto non pone alcun vincolo rigoroso al giudice, liberocomunque di discostarsene in considerazione delle circostanze del caso concreto;
- (b) la personalizzazione del risarcimento compete al giudice, che vi provvede variando il valore pecuniario del punto, e non al medico legale, che non può a tal fine variare il grado di invalidità permanente suggerito al giudice;
- (c) la tabella indica la misura del risarcimento per il danno biologico, e cioè per tutte le conseguenze menomanti, invalidanti, affaticanti, oppressive, disfunzionali, nessuna esclusa, causate da una compromissione dell'integrità psicofisica.

I valori ivi indicati, se necessario opportunamente personalizzati in considerazione delle circostanze del caso concreto, debbono ritenersi soddisfattivi di tutti i pregiudizi non patrimoniali derivati dalla lesione, ad eccezione della sola sofferenza morale (c.d. danno morale), in ossequio ad una risalente tradizione. Ciò vuol dire che il ristoro del danno non patrimoniale alla salute è destinato ad

esaurirsi integralmente nella dicotomia danno biologico - danno morale, come statuito dalla Suprema Corte (per tutti, si veda il fondamentale *decisum* di Cass., sez. III, 12-12-2003, n. 19057).

TRIBUNALE CIVILE DI ROMA

Tabella di riferimento

Per la liquidazione del danno morale da morte

Anno 2007

Nota esplicativa

1. Il sistema precedente.

E' noto che, mentre la liquidazione del danno non patrimoniale da lesione della salute ha raggiunto - grazie agli interventi del legislatore ed all'opera della giurisprudenza - un assetto ormai sufficientemente stabile e collaudato, permangono tuttora numerose incertezze con riferimento alla liquidazione del danno non patrimoniale da morte di un prossimo congiunto.

Tali incertezze, che per molti hanno avevano riguardato soltanto la misura del *quantum debeatur*, negli ultimi anni si sono estese sinanche alla nozione stessa di "danno non patrimoniale", ed alla esatta ricognizione dei suoi contenuti.

Per evitare disparità di trattamento, e garantire la prevedibilità delle decisioni giudiziarie, il Tribunale di Roma si era dotato sin dal 1996 di una "Tabella" - o, per meglio dire, di una griglia di valori di riferimento, in base ai quali liquidare il danno non patrimoniale patito dai prossimi congiunti della vittima.

Quel sistema rappresentò senza dubbio un passo avanti rispetto alla situazione precedente, perché ha consentito la individuazione di alcuni limiti e massimi al risarcimento: certo non oggettivi e vincolanti, ma di fatto osservati nella decisione dei casi concreti.

Esso ha tuttavia col tempo palesato anche alcune mende, tra le quali tre in particolare:

- una incompleta elencazione dei possibili casi (non era espressamente prevista, ad es., l'ipotesi della perdita dei nipoti, dell'avo, dei cugini, del convivente *more uxorio*);

- una previsione piuttosto ristretta di fattori di correzione del valore base del risarcimento (limitati alla esistenza o meno di altri congiunti ed alla convivenza della vittima col congiunto);

- l'omessa considerazione dell'età sia della vittima che dell'avente diritto al risarcimento, con la sola eccezione del figlio che domandasse il risarcimento per la perdita del genitore (nel qual caso era prevista una personalizzazione a seconda che l'avente diritto fosse minorenne o maggiorenne).

Tutti e tre questi limiti, alla fine, producevano il medesimo risultato negativo: se la Tabella veniva applicata in modo rigoroso, non era possibile tenere conto in modo adeguato delle circostanze del caso concreto, specie di quelle non previste (ad es., l'età della vittima); se, per contro, si decideva di discostarsi dalla tabella per tenere conto delle peculiarità del caso concreto, quest'ultima diventava uno strumento inutile ed insufficiente per garantire parità di trattamento e prevedibilità delle decisioni giudiziarie.

2. La nuova tabella.

Per ovviare agli inconvenienti sopra descritti, si è deciso a partire dal 2007 di adottare un sistema basato su una impostazione diversa, meglio in grado di garantire una adeguata personalizzazione del risarcimento.

Tale sistema muove dalla ovvia considerazione che i fattori di cui tenere conto nella *aestimatio* del danno da morte sono molteplici, ma alcuni di essi sono indefettibili, e cioè:

- (a) il rapporto di parentela tra vittima e superstite, dovendosi presumere che il danno sarà tanto maggiore quanto più stretto è tale rapporto;

- (b) l'età della vittima e quella del superstite, dovendosi presumere che il danno sarà tanto maggiore quanto minore è tale età, in quanto destinato a protrarsi per un tempo maggiore;

- (c) la convivenza tra vittima e superstite, dovendosi presumere che il danno sarà tanto maggiore quanto più stretta era la frequentazione tra vittima e superstite.

Per tenere adeguato conto di tali variabili, si è deciso di adottare non più un sistema "rigido" basato sulla previsione di un importo risarcitorio di base da variare in più o in meno, ma di un sistema "a punti", basato cioè sulla attribuzione al danno di un punteggio numerico a seconda della sua presumibile entità, e nella moltiplicazione di tale punteggio per una somma di denaro che costituisce il valore ideale di ogni "punto" di danno non patrimoniale.

Si sono così divisi i fattori variabili teoricamente influenti sul risarcimento in 5 classi (rapporto parentale, età della vittima, età del superstite, convivenza, composizione del nucleo familiare), ed in ciascuna classe si sono previste molteplici variabili, ad ognuna delle quali è stato assegnato un punteggio.

Il risarcimento totale è quindi pari al punteggio risultante dalla sommatoria dei punti previsti per ciascuna delle circostanze ricorrenti nel caso concreto, moltiplicato per il valore monetario del punto.

Quest'ultimo, sulla base della media di un campione di 100 sentenze decise dalla XIII sezione del Tribunale negli anni 2004-2005, è stato fissato in via equitativa nella somma di € 8.000, attualizzati al 1.1.2007.

Così, ad esempio, la liquidazione del danno patrimoniale per la perdita di un figlio ventenne, domandato da un genitore 40enne che conviveva col defunto, sarà pari a 8.000 (valore unitario del punto) per 29 (20 punti per il rapporto di parentela, 4 per l'età della vittima, 3 per l'età del superstite, 2 per la convivenza), e cioè € 232.000.

3. Uso della tabella.

E' superfluo aggiungere che la Tabella costituisce un mero parametro di riferimento, e quindi i valori in essi sono puramente indicativi. Nulla vieta al giudice, dandone adeguata motivazione di liquidare somme maggiori od anche minori, ove lo richiedano le particolari circostanze del caso concreto.

Liquidazione del danno non patrimoniale da morte		
Tabella dei punti		
(la liquidazione avviene moltiplicando il n. di punti per 8.000)		
Classi	Variabili	Punti
Rapporto tra vittima e sopravvissuto	perdita del figlio	20
	perdita del genitore	18
	perdita del coniuge o del convivente <i>more uxorio</i>	18
	perdita del fratello germano	7
	perdita del fratello unilaterale	6
	perdita dell'avo	6
	perdita del nipote <i>ex filio</i>	5
	perdita del nipote <i>ex fratre</i>	2
	perdita del cugino	2
Età della vittima	0-20	4
	21-40	3
	41-60	2
	61-80	1
	oltre 80	0,5
Età del congiunto avente diritto al risarcimento	0-20	4
	21-40	3
	41-60	2
	61-80	1
	oltre 80	0,5
Convivenza tra vittima e congiunto	vittima e congiunto convivevano	2
	vittima e congiunto non convivevano	0
Composizione del nucleo	Assenza di altri congiunti conviventi	2

Liquidazione del danno da invalidità temporanea

anno 2007

- per ogni giorno di invalidità temporanea assoluta al 100%: € 40,16

Liquidazione del danno morale

Da $\frac{1}{4}$ ad $\frac{1}{2}$ della somma liquidata a titolo di risarcimento del danno biologico
